Solutions
**SUSPENDED
PLATFORM
SYSTEMS**

Usher Access Solution Suspended Platforms are incredibly easy to assemble. Our system offers superior stability, easy installation and are extremely versatile.

Our qualified team can supply and install suspended platforms to provide you with the best possible access solution and ultimately save you time and money.

Our suspended platforms are sturdy, strong, reliable and most importantly, our system is modular, so it can be applied to numerous configurations.

Our system has incorporated, world leading fail-safe technology, including high tensile cables and superior hoist mechanisms. You can be confident that every project you undertake will be completed with the upmost safety. And thanks to its modular format, components, can be easily transported and erected on site in no time.

Features

As the leading Australian supplier of Altrex suspended platforms, our systems can be configured to suite numerous applications. Our equipment provides the highest level of safety in the industry and thanks to the modular componentry, platforms are easy to transport and store.

Some of the main advantages include:

- **Cost effective** – suspended platforms are effective for access to heights where use of static scaffolding can be cost prohibitive.
- **Quick and easy installation** – No heavy lifting is required. The equipment easily fits into conventional residential lifts.
- **High level of safety** – We provide industry leading Safety management plans, fall arrest systems and independent static lines.
- **Configuration** – Suspended Platforms can be customised to suit unconventional building facades.

Configuration

Wide Modular Suspended Platform

Small Modular Suspended Platform

Modular Suspended Platform Double Deck

MHB with corner sections

Components

Our hoist is compact and reliable. It is easy to handle, this is due to the reduced number of parts. It also produces 50% less noise than other hoists

We have a range of fixed and mobile Roof beams for suspended platforms. Roof beams can be built from just a few parts. No tools required. The mobile construction can be used anywhere. With the ergonomically designed counterweights, the system is extremely

Technical Specifications
